

Graded Homework Assignment: Model Submission

Submission Deadline: July 7th, 2026, 19:59 German Time

Submit this file as a digital PDF only. Do not print, scan, or flatten the form. Interactive form fields must remain active so that submissions can be read automatically; flattened or scanned files cannot be parsed and will not be graded. Include this sheet in your submission archive. Name the file *<initials>_<last three digits of matriculation number>.pdf* (e.g. *MS_042.pdf*). Use exactly 2 characters for your initials. Use a dot as decimal separator for all numerical values (e.g. 0.95, not 0,95). Entries with wrong separators will not be processed and count as missing.

STUDENT INFORMATION

Name *str*

Matriculation Number *int*

E-Mail *str*

Feedback and your score will be sent exclusively to this address. Ensure it is correct and reachable.

MODEL

Model Filename *str*

Including file ending. An incorrect filename will result in the model not being graded, as if it was not submitted.

Model Description *str*

Algorithm / model class, hyperparameters, preprocessing steps.

PERFORMANCE EXPECTATION ON HOLD-OUT SET

Expected R2 Score *float, 2 decimals*

Corridor Width *float, 2 decimals*

Acceptable deviation around your expected R2 score, e.g. 0.05: score falls within [expected_R2 - corridor_width, expected_R2 + corridor_width].
